Safety Switch Box

The Safe / Permit Switch Box (SSB) is a box containing all the components used to manage the Safe / Permit signal.

When switched in Permit position, the switch enables the Safety Signal to go to the Munition Interface and to enable the fire line.

When switched in SAFE position, the switch disables the Safety Signal to go to the Munition Interface and disable the fire line.

Fully qualified MIL-STD-810F, the SSB is suitable for applications that require sure and reliable switch with no possibility of error in operation.

REACH, RoHS and CE marking compliance.
